Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-21, 23-43 and 45 are rejected under 35 U.S.C. 102(b) as being anticipated by JP 2001089615.

The reference discloses a blend of two polyethylenes wherein one or both is made using a metallocene catalyst and the composition is useful for rotational molding operations, wherein each of the disclosed property ranges is substantially overlapping with those claimed instantly (see abstract). It should be noted that the art is replete with polyethylene blends for the making of molded products (as evidenced by numerous references in applicants' IDS), and therefore those of ordinary skill in the art are well versed in the making of such blends. Accordingly, the reference provides suitable recommendation and guidance in the making of polyethylene blends across a broad scope of the expressly recommended property ranges, and is therefore is anticipatory within the meaning of 35 USC 102.

Regarding claims 4, 5, 16-20, 26, 27 and 38-42, the unreported properties are deemed to be inherent because metallocene catalysts have been used in the reference

method and because the other measured properties of the reference components and blends are substantially overlapping with those claimed. The burden of proof is shifted to applicants to show that the products made using the reference methods would not contain the claimed unreported properties.

Allowable Subject Matter

3. Claims 22 and 44 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The references cited on this record have not disclosed the claimed blend wherein at least one of the blend components is itself a blended polyethylene.

4. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Roberto Rábago whose telephone number is (571) 272-1109. The examiner can normally be reached on Monday - Friday from 8:30 am - 4:00 pm.
